NAGARAJU G

JAVA FULL STACK DEVELOPER

SUMMARY

Experienced IT professional with 3 years of expertise in Object Oriented Programming, Analysis, Design, Documentation, Integration, and Testing. Dedicated to delivering quality solutions and seeking challenging IT role.

EXPERIENCE

Company : Talent Smart (Jul' 2022 - Present)

Project Name : Gummadi Built (Jul' 2022 - Present)

Role : Full Stack Developer

Environment : Springboot, Angular

Description

A cloud based E-procurement application that automates the Selective tendering for design and builds for wide array of services between clients and vendors.

Roles and Responsibilities

- Developed web applications for backend systems utilizing Angular 14, Angular CLI, HTML5, TypeScript, SASS, and CSS3.
- Implemented complex forms and performed validations using Angular 14 Reactive forms and Form Builder.
- Utilized Material components such as calendars, masks, uploaders, sliders, alerts, and modal dialogs to enhance the UI.
- Consumed RESTful web services using Angular HTTP Module and transformed responses using RXJS operators.
- Configured Angular routes using Router module for efficient lazy loading of modules and components.
- Employed RXJS Observables and operators for handling HTTP JSON responses, and implemented custom error handling.
- Created and integrated Spring services, controllers, and DAOs to achieve dependency injection and object wiring.
- Developed controllers, interfaces, and implementation classes using Spring MVC framework, and utilized Spring Boot for microservice architecture through REST.
- Demonstrated proficiency in relational database design and wrote SQL queries, stored procedures, views, and functions using PostgreSQL.
