SUMAMRY

Having 3 years of IT experience in Object Oriented Programming, Analysis, Design, Documentation, Integration and Testing

EXPERIENCE

Company   :   Talent Smart (Jul' 2022 - Present)

Project Name :   Gummadi Built (Jul' 2022 - Present)

Role   :   Full Stack Developer

Environment :   Springboot, Angular

Description
A cloud based E-procurement application that automates the Selective tendering for design and builds for wide array of services between clients and vendors.

Roles and Responsibilities

- Involved in web application development for backend system using Angular 14, Angular CLI, HTML5, TypeScript, SASS and CSS3.
- Used Angular 14 Reactive forms to implement complex forms and performed the validations using Form Builder.
- Used various Material components such as calendars, masks, uploaders, sliders, alerts, and modal dialogs for developing the UI.
- Consumed RESTFUL web services using Angular HTTP Module and transformed the response using RXJS operators.
- Defined Angular routes using Router module for components at module level to enable lazy loading for modules and components.
- Worked with RXJS Observables and operators when working with HTTP JSON responses and defined custom error handler to handle error scenarios.
- Created and injected Spring services, Spring controllers, and DAOs to achieve dependency injection and to wire objects of business classes.
- Worked extensively on developing controllers, Interfaces and implementation classes using Spring MVC framework & used Microservice architecture with Spring Boot based service through REST.
- Worked on relational database design and writing SQL queries, stored procedures, views, and functions with PostgreSQL.
